

Single Head Punching Machine

IMT-NST-G1

FEATURES :

- This machine is used for punching various materials in the aluminum template pull system of buildings
- Mainly used for U-shaped standard plates, 100-600mm can be processed
- Two positioning methods are available: hole positioning and U-plate end positioning
- Hydraulic cylinder output punching

TECHNICAL PARAMETERS :

Punching Hole	1
Punching Needle	45 * 16.5mm
Punching U-Plate	100-600mm 100*100 C-Shape
Working Table Height	950mm
Voltage	400V / 50Hz
Motor Power	3kW
Dimension	940*980*1400mm
Weight	±220Kg
